

Mailboxes

One of the leading Swiss companies in mailbox construction is s:stebler. Graced with a timeless design, our products enjoy an excellent reputation with our customers. They are versatile in their possible uses and made of premium materials. These factors plus meticulous craftsmanship explain the popularity of mailboxes from s:stebler – genuine Swiss quality is the reason.

Stable and durable

Our mailboxes are made of a rust-free and corrosion-proof aluminum alloy. All models have a letter slot with rubber seal plus patented water drain channels that render them rain-proof. All spare parts can be supplied at any time. All these advantages assure matchless durability.

Versatile and flexible

Mailboxes from s:stebler are manufactured in standard sizes and to measure. With an integrated doorbell system, communication elements can be incorporated (intercom, video monitoring, light switch, etc.). The systems can be equipped with lighting of all kinds and are all available ready for operation. The possibilities for mounting are versatile and variable.

s: 75 F

Lighting

Lighting options

Lighting concepts wed function with esthetics. They enable an architectural language to be extended effectively to site design as well. The mailboxes can be fitted with LED light panels inside, outside and to the side of the hinges, as desired. These and other lighting options offer a variety of possibilities for atmospheric lighting that is practical, safe and appealing down to the last detail.

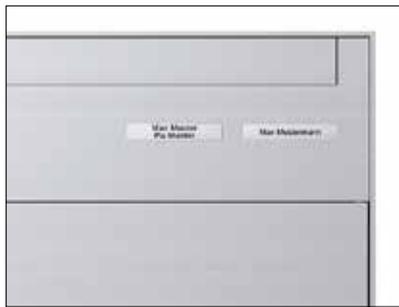

Options/built-ins

Combinable and installable any way desired

One big plus with s:stebler is flexibility. We can satisfy almost any request you have regarding materials, colors, types of hinges, and compartmental sizes and regarding installation and application. In addition, we have a diverse range of possibilities for

tailoring your mailbox system to your needs; from an integrated doorbell system and intercom to indirect lighting and customized labeling elements. Intelligent solutions are an additional boost to your safety: video monitoring, badge reader, touchscreen and much more.

Optional engraving of name signs in one-line or two-line versions

Extra rotating "No Advertising" sign

Signage systems

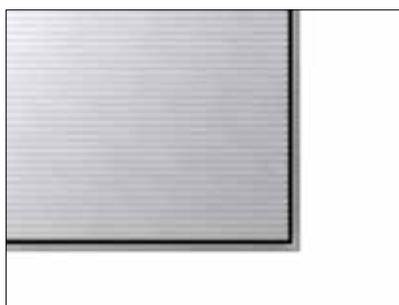

Cylinder cutout provided by the customer for the master key system cylinder being delivered

CNS bow handle

CNS segmented handle

Dessinal compartment door

Configured as requested

Maximum combination possibilities

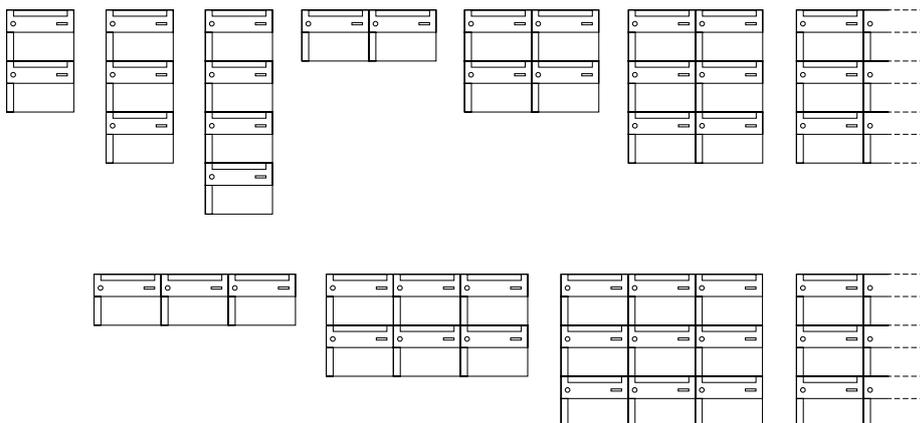

What will it be? One, two, three or a large number of letter and package compartments? With or without deposit compartment? You decide the number and arrangement of letter and package compartments. We work together with you to find the perfect solution to meet your needs and to satisfy your ever wish in compliance with Swiss Post standards.

Only letter compartments

The number and arrangement can be expanded as required.

Letter and package

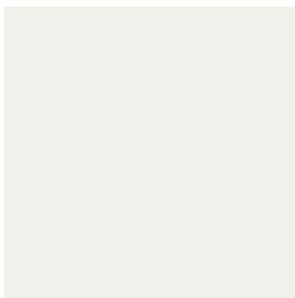

The number and arrangement can be expanded as required.

Colors

Our Colors – Tailored to Your Unique Project

stebler offers a carefully curated range of eight standard colors, always available in stock.

Do you have specific color preferences? No problem! We can create your custom color, whether based on RAL, NCS, or your own color sample. Custom colors offer unlimited possibilities but may extend delivery times and incur additional costs.
