

Implemented  
Projects 2015/2016

S. I.

## Individual

People's needs are increasingly moving in the direction of individuality: our approaches to life and work, our mobility, and the demands we place on products of everyday life. Generation Y is increasingly influencing decisions involving innovations and adding the latest nuances to this trend. The letter "Y" is famously synonymous with the word "Why", and this generation is always asking that question. We are pleased the products that leave our factories in Oensingen stand up to these critical questions. We decided years ago to invest in Switzerland as a work location and recognized early on that our responses to customer requests have to be ever more individualized and sustainable. Everything we develop, be it a mailbox or a roof window, we then produce in Oensingen by hand using the most modern technologies – from materials to technical properties. A parcel compartment in a mailbox system

can be opened using an app, enabling the customer to have a parcel delivered at any time but still remain safe and sound. Our solutions involving metal construction lend the entryway to your property an individual look with a mailbox system, a projecting roof, and entry doors made of metal and glass, to name just a few examples. We also remain competitive and innovative by aspiring to make all of our customer's dreams reality. The latest edition of our "Implemented Projects" brochure features a selection of products and solutions from recent years. We are proud our customers keep giving us challenges that go beyond the commonplace. At this juncture we would like to thank every single customer who has opted for our products.

Anita and Markus Stebler

# Glass house

In glass construction, we develop innovative products incorporating state-of-the-art technology. Besides our tried-and-test standard products, we manufacture glass facades, roof windows, pergolas, conservatories, and louver glazing to fit individual customer wishes. We have the optimum glazing solution for every room, facade or roof no matter what the situation.

Windows provide a building with light,  
air and a view of the outside world.

SIZE

2000 x 1224 mm, 4 louvers

GLAZING

HM triple glazing  $U_g$ -value 0.6 W/m<sup>2</sup> K
