

s: easy smart parcel box –
secure, simple, clever

With the s:easy smart parcel box system, merchandise or documents can be deposited in a secure compartment until being picked up. In the future, the recipient no longer has to be present personally to receive these items. The entire system is very clever and easy to use.

The mail carrier selects the recipient and the required compartment size using a direct-selection button in the doorbell system and deposits the merchandise or documents in the secure parcel compartment. The recipient is informed by e-mail about the delivery and picks up the item using a PIN or badge. An e-mail is sent with a notification of the pick-up or, if need be, a reminder to do the pick-up.

With s:easy, parcels, documents or keys can be deposited easily and securely. The Parcel Box is made of aluminum and available on request powder-coated or with a plain or colored anodized finish. And as you would expect, it is manufactured to the highest quality standards and with an elegant design at our Swiss site in Oensingen.
